

Planetary Head Round Tube Polishing

Finishing

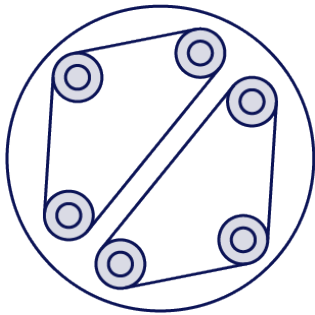

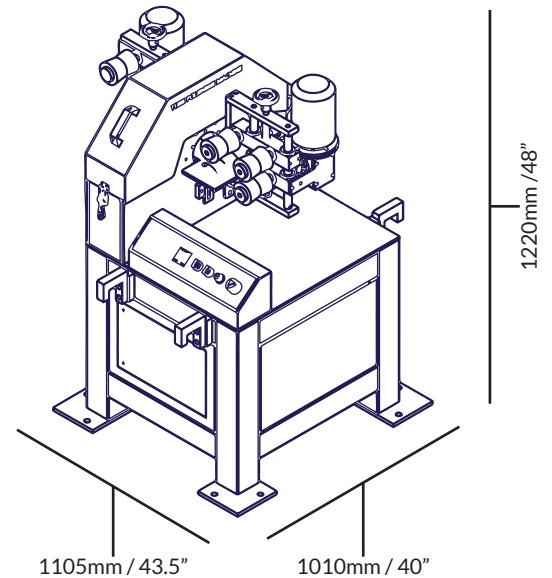

RTP04

Valgro auto feed planetary tube grinding machines do not spin the tubes during the process, which creates a safe operator environment and eliminates the possibility of barber poling. Planetary systems also do not require tubes that are perfectly round, and instead can process tubes that are oval or have irregular shapes. Most significant, they can grind bent tubes.

Planetary Head Round Tube Polishing

Finishing

- Automatic pipe sander with feeding system.
- Easy consumable replacement.
- Adjustable conveyor speed.
- Achieve different finishes with various grit combinations.
- Compact design for small space units.
- User friendly interface.
- Robust and precise system.
- Built with keeping all safety standards in mind.

SPECIFICATIONS	Metric	Imperial
Min - Max. Dia	10 - 100mm	0.4 - 4"
Min. Length	475mm	18.7"
Feed Speed	0.5 mpm to 10 mpm	1.5 fpm to 28 fpm
Brush Size (OD x Width)	950 x 40 mm	37.4" x 1.5"
Work Surface	Outer Diameter	
Conveyor Type	Roller	
Power	6HP
