

Rotary Brush Machine

Finishing

The Valgro-Hyzer Rotary Brush Machine delivers precise deburring, edge rounding, and surface finishing for sheet metal components. Engineered for consistency and productivity, it ensures superior quality and coating-ready surfaces in every pass.

Features

- Edge Rounding
- High Productivity
- Precise deburring
- Magnet + Vacuum
- Precision Deburring
- Versatile Processing
- Coating-ready surfaces
- Uniform edge rounding
- Operator-Friendly Design
- Adjustable brush pressure
- Suitable for various metals
- Compact and robust design
- Consistent surface finishing
- Multi-directional brushing action

BEFORE

AFTER

SPECIFICATIONS	Metric
Max. Working Width	910mm
Min. Part Size	50 x 50mm
Working Thickness	1 to 100mm
Machine Weight	2500 kg
Abrasive Belt Size	2000 x 1020mm (P x W)
Abrasive Brush	300 x 40 x 300mm (ODxIDxW)
Conveyor Type	Belt
Power	11.75HP
Bed	Magnet + Vacuum
Total Power	25.5 hp
